

4600 $\rightarrow \pi^+ \pi^- J/\psi$ data before Feb. 28

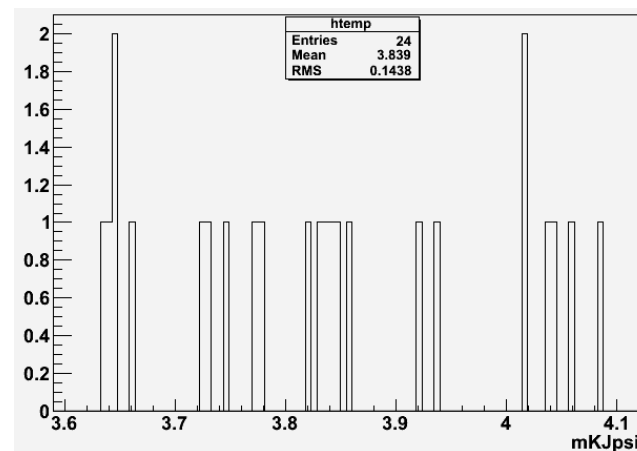

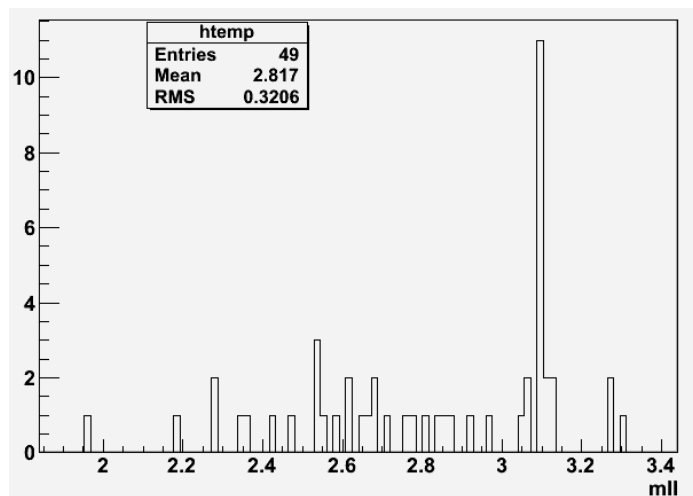

Blue histogram is MC shape of $\Upsilon(4600) \rightarrow Z_c(3900) \pi$

Green histogram is the phsp shape

4600 $\rightarrow$ K^+K^-J/ψ data before Feb. 28

The mis-identification of $\pi^+\pi^-J/\psi$ should be less than 1/200000
