$q\bar{q}$  scaled by the sideband events

Branching Fractions for Lc(2625) scaling: 41%

$q\bar{q}$  scaled by the hadron MC

Branching Fractions for Lc(2625) scaling: 51%

# Consistency check between sideband and signal region of hadron MC

➤ The events in the sideband region can't describe the background distribution in signal region!

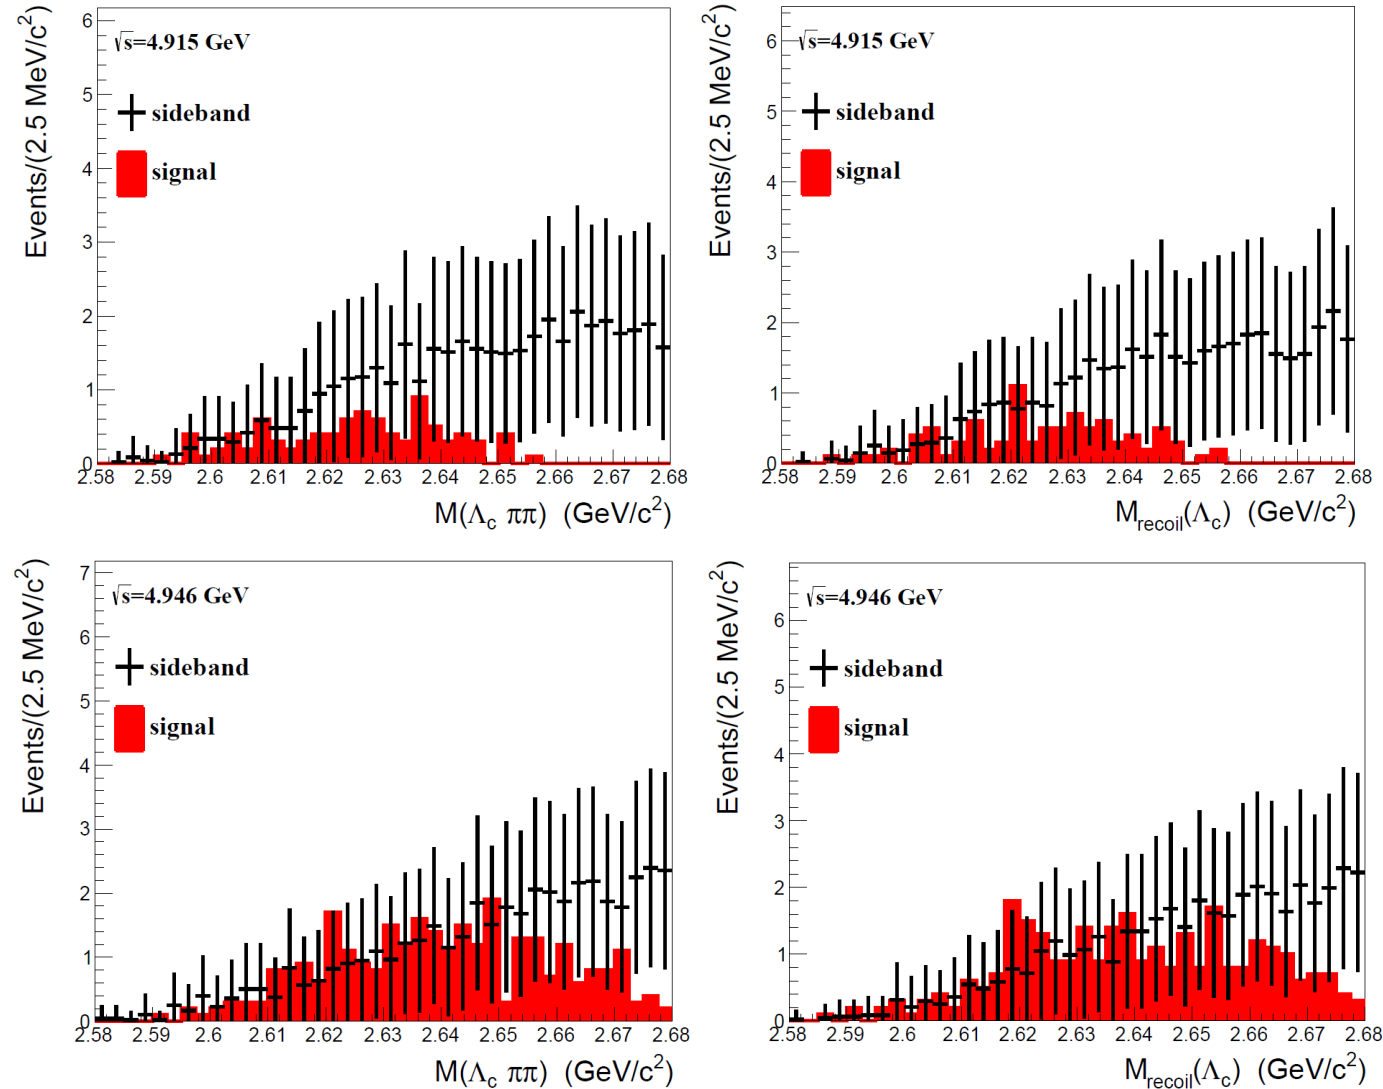

Figure: Comparison of the hadron MC sideband and signal region.

# Consistency check between data sideband and inclusive hadron MC

➤ The shape of hadron MC looks consistent with data within the uncertainty.

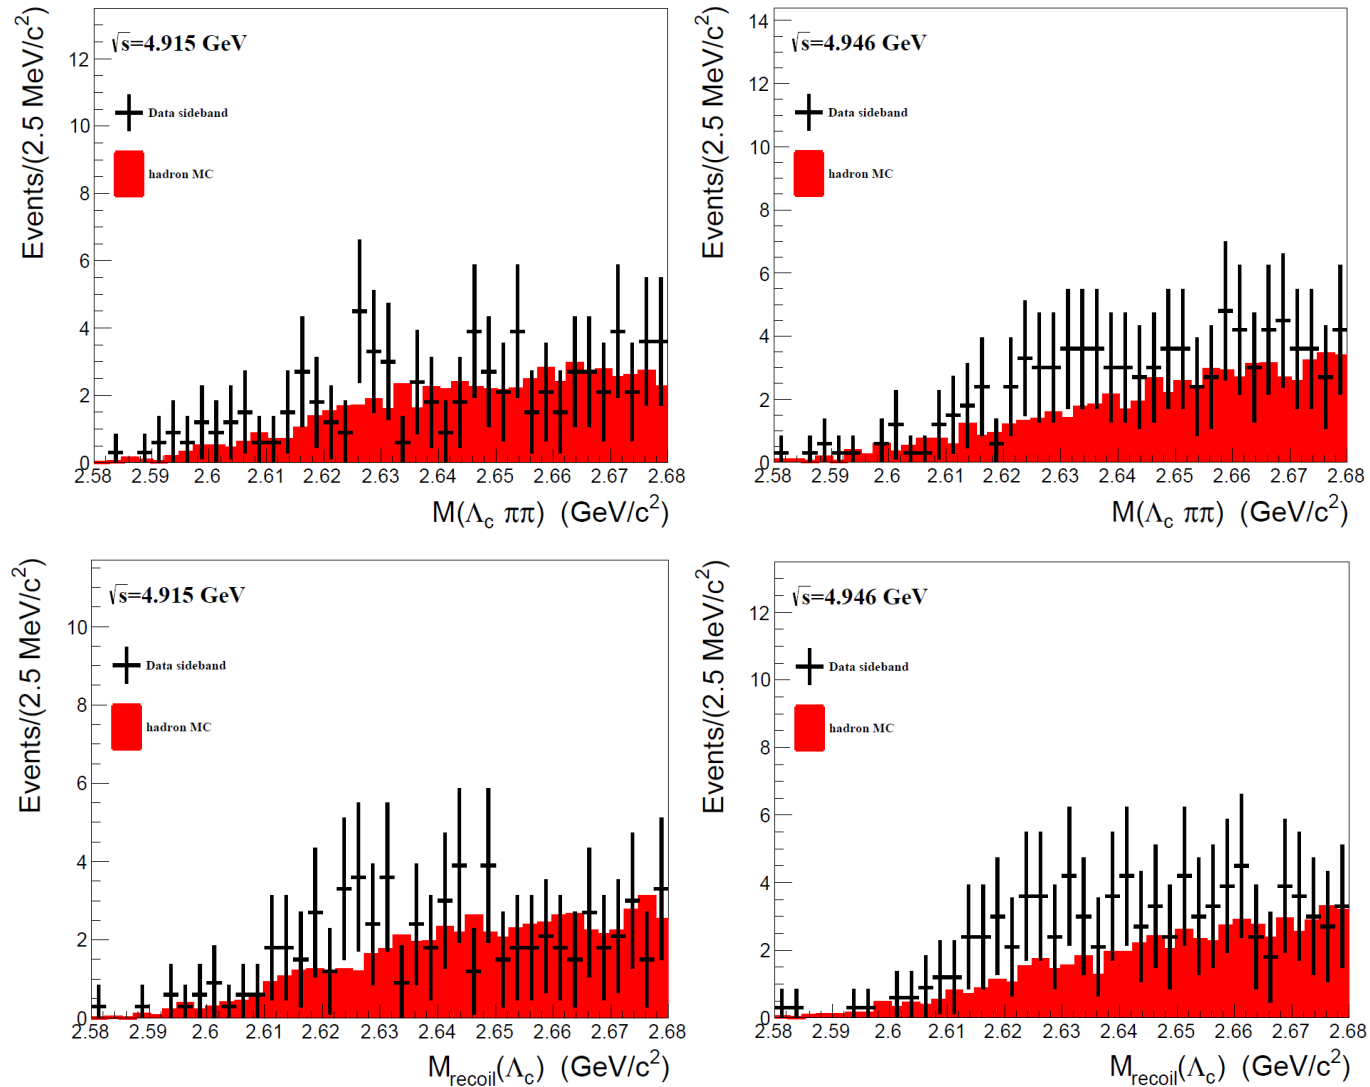

Figure: Comparison of the hadron MC sideband and the Data sideband.
